COMMUNITY RELATION POLICY

ENIKKOM CONSTRUCTION LIMITED recognizes that impacts on both neighboring residents, businesses and the broader Community will arise during project execution and regards managing environmental and community issues as integral components of its business.

This policy is designed to anticipate, understand and respond more efficiently to community relations issues by implementing communications processes that will adapt to changing needs.

This policy is to provide framework to move towards establishing collaborative relationships with the community and stakeholders. Collaboration typically involves sharing information, arriving at a common definition of a problem or opportunity, committing to working together, and suspending preconceptions to find and implement new solutions.

Community Objective

To facilitate delivery of project on time and within budget by integrating community relations into all facets of the project. This will be achieved by:

Community Interaction – interacting with community in a way that is, and is seen to be, accessible, transparent and responsive.

Company Approach – demonstrably treating the community with sensitivity and respect in relation to its issues, views and suggestions.

Mutual Trust and Respect – achieving a level of mutual trust and respect that leads to problem-solving and solutions which improve the overall project.

Shared Recognition – achieving shared community recognition of the ENIKKOM CONSTRUCTION best practice performance in project delivery.

Management Systems – using innovative, people-focused management systems to achieve the above
